

MBOOK DOCUMENTATION

ABSTRACT:

The **Student Mentoring and Counselling System** is a web-based platform designed to digitize and manage mentor–student interactions within educational institutions. The system allows mentors to record counselling sessions and provide remarks, while students can view their academic profiles, performance analytics, and mentor feedback. Administrators can centrally monitor mentoring activities and manage records. Real-time notifications ensure that updates are instantly visible to relevant users. The system improves transparency, communication, and efficiency by replacing manual mentoring records with a centralized digital solution.

INTRODUCTION:

Mentoring and counselling play an important role in supporting students academically and personally. Traditional methods of maintaining mentoring records are often manual and inefficient, making it difficult to track student progress and feedback.

The **Student Mentoring and Counselling System** provides a centralized digital platform that allows mentors to record counselling sessions, provide remarks, and monitor student development. Students can access their academic information and mentor feedback, while administrators can supervise all mentoring activities. The system improves communication, record management, and accessibility through a modern web-based interface.

TECHNOLOGIES USED:

FRONTEND:

- **React.js** – For building dynamic user interfaces
- **TypeScript** – For type-safe and maintainable code
- **Vite** – Fast build tool for development
- **React Router** – For navigation between pages
- **Tailwind CSS** – For responsive UI design
- **Recharts** – For visualizing academic performance
- **Lucide React** – For UI icons

BACKEND:

- **Supabase** – Backend service for database and authentication
- **Supabase JS** – Client library to interact with backend services
- **PostgreSQL** – Database used to store application data
- **Real-time subscriptions** – For live updates and notifications

SCREENS INCLUDED IN THE DOCUMENTATION:

The following screens should be included in the project report:

1. Login Page

- User authentication interface.
- Allows users to log in based on their role.

The screenshot shows the login interface for the 'SHRI VISHNU ENGINEERING COLLEGE FOR WOMEN (AUTONOMOUS)'. The header includes the college name, logo, and accreditation details. Below the header is a 'MENTORING RECORD' section with eight icons representing different mentoring aspects: MOTIVATION, ADVICE, SUCCESS, DIRECTION, COACHING, SUPPORT, GOAL, and TRAINING. A 'Sign in' form is centered, featuring a role selector (Student/Mentor), email and password fields, and a 'Sign in' button. A demo user note is provided below the form. The footer contains the website URL 'www.svecw.edu.in'.

SHRI VISHNU ENGINEERING COLLEGE FOR WOMEN

2. Student Dashboard

- Displays student profile information.
- Shows academic performance and attendance charts.

The screenshot displays the 'M-Book Mentoring' Student Dashboard for Nandini Kumar. The left sidebar lists navigation options: Dashboard, Personal Details, Parent Details, Academic Performance, Counselling Records, Previous Education, Interests & Insights, Backlog Details, Mentor Remarks, Attendance Analytics, Performance Charts, and Goal Setting. The main content area shows the student's profile with a welcome message, a profile card with personal and contact details, and a row of five performance metrics: CGPA (8.2), Attendance % (76%), Backlogs (0), and Counselling Sessions (5). Each metric is accompanied by a small icon and a trend indicator.

- Shows real-time notifications.
- Displays unread counts and updates.

7. Admin Dashboard

- Centralized monitoring interface.
- Displays all counselling records and mentor remarks.

CONCLUSION:

The **Student Mentoring and Counselling System** provides an efficient digital platform for managing mentoring activities within educational institutions. It enables mentors to track counselling sessions, allows students to access their progress and feedback, and provides administrators with centralized monitoring capabilities. By integrating real-time updates and role-based dashboards, the system improves transparency, communication, and record management, making the mentoring process more effective and organized.
